Daikin Air & Water-Cooled Screw Chiller Maintenance, Operation & Service Course

The Air & Water-Cooled Screw Chiller Maintenance, Operation and Service Training Course is structured to provide basic classroom instruction, demonstrations, and "hands-on" exercises designed to familiarize the student with the product features, operation, maintenance and service requirements for Daikin Screw chiller products. The standard program for the maintenance, operation and service seminar is four and one-half days of intensive training.

The products covered in this seminar will be the AGS, AWS & AWV air-cooled Screw chillers and the WGS & WWV water-cooled chiller Screw chiller.

Learning Outcomes:

Upon successful completion of this course, students will be able to:

- Define and analyze the basic cycle of air and water-cooled chillers
- Distinguish the difference between DX and flooded evaporators
- Describe Screw compressor & chiller design & components
- Identify different types of chillers and their manufacturing processes during a plant tour and product review
- Interpret electric schematics
- Identify and operate MicroTech® Microprocessor controls for AGS, & AWS during hands-on lab sessions
- Assess Electronic Expansion Valve (EXV) operation
- Diagnose and maintain Solid-State, Wye Delta & VFD Starters
- Perform general maintenance and service, evacuation, refrigerant & oil-charging procedures
- Analyze operational data using log sheets and fault history
- Secure removal and replacement of compressors and compressor drives
- Distinguish between the different software versions for specific Daikin Applied products
- Identify chilled-water and condenser-water systems

Upon completion of this training course, students will be provided access to the Daikin Applied Technical Response Center for technical assistance on Daikin Screw chiller products.

Daikin Learning Institute Safety Statement

The goal of Daikin Learning Institute is to provide product specific training and information necessary to establish a high level of proficiency in operating and servicing Daikin products. While product specific safe work procedures are built into our training program, knowledge and formal training of an applicable safe working culture, competency, practices and procedures for working in the HVAC field is the obligation of the employer and individual prior to attending Daikin Applied equipment training.
