Magnitude® WMC Magnetic Bearing Chiller Service & Repair Course

The Magnitude® WMC Magnetic Bearing Chiller Service & Repair course is designed to teach the maintenance and service technician how to maintain, operate, troubleshoot, and repair Daikin Magnitude WMC Magnetic Bearing Chillers. Compressor monitor software is provided. The standard program for the Magnitude WMC Magnetic Bearing Chiller Course is four and one-half days of intensive training.

Prerequisite:

The student should have a minimum of 5 years experience with Centrifugal chillers to maximize the benefit of this course. The Magnitude chiller uses a centrifugal compressor that has advanced technology.

Learning Outcomes:

Upon successful completion this course, students will be able to:

- Define and analyze the basic refrigeration cycle of water chillers
- Distinguish the three different vintages of WMC chillers
- Describe magnetic bearing with VFD compressor design and operation
- Identify different types of chillers and their manufacturing processes during a plant tour and product review
- Identify and describe the hardware & software of MicroTech® II for the WMC control system
- Operate compressor monitor software interface (computers recommended with Windows XP or later)
- Analyze flooded evaporator with EXV control
- Describe the purpose and function of WMC part-load-balance valves
- Analyze operational data using MT II trends and log sheets
- Perform compressor repair & diagnostics
- Operate MicroTech® II controls using hands-on lab sessions
- Utilize compressor test harness (provided) for safe testing
- Perform WMC chiller maintenance
- Upon completion, student may access the compressor support website

Upon completion of this training course, students will be provided access to the Daikin Applied Technical Response Center for technical assistance on Magnitude® WMC Centrifugal products.

Daikin Learning Institute Safety Statement

The goal of Daikin Learning Institute is to provide product specific training and information necessary to establish a high level of proficiency in operating and servicing Daikin products. While product specific safe work procedures are built into our training program, knowledge and formal training of an applicable safe working culture, competency, practices and procedures for working in the HVAC field is the obligation of the employer and individual prior to attending Daikin Applied equipment training.
