Instruction Materials  
Coffee Breaks  
Lunch

## Self-Contained Service Course

The Self-Contained Service Course is structured to provide classroom instruction, demonstrations and exercises designed to familiarize the student with the product features, installation requirements and service procedures for Daikin Self-Contained units.

To get the most from the course, the student should have an understanding of the refrigeration cycle, basic electronics and simple control circuits. The course will use these basic concepts to develop an understanding of the Daikin Self-Contained product. It is recommended that all students read/review IM-1032 [CLICK HERE](#), prior to the start of class.

The program for Self-Contained service training is two full days of intensive training.

**Prerequisite: MicroTech® III Controls Course is required prior to attending the Self-Contained Service Course (dates & locations below)**

**Apr 30-May 1 Daikin Applied, Plymouth, MN**

### Learning Outcomes:

Upon successful completion of this course, students will be able to:

- Install and commission Daikin Self-Contained (SWP & SWT) units using standard methods
- Identify and distinguish the purpose and function of Self-Contained components
- Describe unit sequence of operation in all modes and states
- Navigate & modify adjustment settings and parameters in MicroTech® III (MT III) controller, and operate MT III to meet job specifications
- Utilize electrical meters, wiring diagrams, and MT III controller for unit diagnostics and troubleshooting
- Demonstrate the preparation, set-up, and operation for Daikin Self-Contained gas, electric, and hot-water heat
- Prepare and report accurate commissioning data on Daikin Warranty Registration form
- Perform proper preventative maintenance per the Daikin operations manual

## Daikin Learning Institute Safety Statement

The goal of Daikin Learning Institute is to provide product specific training and information necessary to establish a high level of proficiency in operating and servicing Daikin products. While product specific safe work procedures are built into our training program, knowledge and formal training of an applicable safe working culture, competency, practices and procedures for working in the HVAC field is the obligation of the employer and individual prior to attending Daikin Applied equipment training.
