

Protect your HVAC investment with a Daikin Maintenance Plan

A suite of options, customizable to you and your building

Whether your new chiller or entire HVAC system is pending installation or you are looking to reap the most energy savings from your existing HVAC system, we have a Daikin maintenance agreement for you. All plans are serviced by factory-trained technicians, working with your on-site staff to optimize and enhance the value and life of your building's most expensive asset.

First-year Maintenance

- Perfect for newly installed chillers/systems
- Protects your warranty and investment

Inspection Plan

- Budget-friendly option for all HVAC equipment
- Provides regular maintenance upkeep after the warranty has expired

Labor Maintenance

- Face fewer unexpected repair payments
- Highly trained Daikin technicians maximize energy efficiency

Comprehensive Maintenance

- Ensures no additional, unexpected maintenance or repair expenses for covered services
- Priority service from the most knowledge team

Labor Maintenance Plan

Reduce budget impacts with monthly labor plan

Let our team of Daikin factory-trained technicians handle all regularly scheduled maintenance of your HVAC system, keeping your building air at its best. From seasonal startup to shutdown, our team will provide best-in-industry on-site system evaluations. If repairs are needed to your system, all labor costs for repairs for covered services are included—parts and materials are an additional charge. Keep year-over-year costs in check with our team on your side.

Maintain energy efficiency, minimize downtime

Our technicians will save you time and money, maintaining optimum performance through regularly scheduled maintenance. Annual condenser cleaning is included on all chiller systems when elected, adding an additional touchpoint to spot potential issues to proactively manage your building. If problems with your system arise, our available 24-hour, 7-day/week service ensures that your equipment is our priority.

Safety for you, your staff, and your equipment

Daikin Building Solutions will instruct your on-site staff on proper operational handling of your equipment. This ensures the safety of your team and your building through the proper use of your HVAC equipment.

Is this the plan for you?

- You look to protect your investments with fewer unexpected repair payments.
- You seek a team of highly trained Daikin technicians to ensure your system continues to maximize its energy efficiency.
- You value dependability from both your system and maintenance technicians.

Customizable, flexible plan to protect your HVAC equipment:

All labor costs for repairs are included for covered services

Regularly scheduled maintenance ensures optimum performance

Factory-trained technicians will provide staff on-site operational instruction

Expert-level technical support

Gain unprecedented visibility into your HVAC equipment. With the addition of Daikin's award-winning Intelligent Equipment®, Daikin System Service Professionals are able to help you proactively maintain your equipment and boost the efficiency of your HVAC system.
