

Trailblazer® AMZ 10–40 Tons

Set your sights on high efficiency at the small end of the air-cooled chiller market

When you are designing and installing projects that demand 10 to 40 ton cooling capacities turn to the new Trailblazer® AMZ chiller. The AMZ takes the proven capability of the Trailblazer air-cooled chiller and blasts into the lower range, starting at 10 tons and delivering outstanding efficiency to meet or exceed ASHRAE 90.1-2016 levels.

The AMZ expands our Trailblazer chiller capacities (10T-240T) with improved performance and competitiveness. The AMZ is positioned so you have an option for applications calling for outstanding performance, low sound levels, easy installation, small footprint at an affordable price.

The combined AMZ and AGZ-E offering now lets you choose whether you need a compact unit that performs like a workhorse or a high performance thoroughbred.

With the AMZ, you will discover:

- **Simplified Installation:** The compact AMZ is engineered for easy installation, with factory-installed strainer and flow switch options.
- **Designed for efficiency:** With the advanced condenser coil design, you will experience a reduction in refrigerant charge and optimized efficiency.
- **Proven technology platform:** AMZ utilizes the same reliable technology as the AGZ-E.
- **Dedicated support:** Our team of experts serve customers 24/7.
